In 2015 a historic nuclear agreement, the Joint Comprehensive Plan of Action (JCPOA), was reached between Iran, the United States, China, Russia, France, Germany, United Kingdom, and the European Union. In the United States, the supporters of the deal hailed it as the most significant foreign policy achievement of President Obama, while its detractors considered it a disaster. Two years have passed and the controversy is still alive. In this two-day conference on Iran's evolving role in the world, a group of prominent international relations experts examine the global and regional impact of the JCPOA.

Friday, Oct. 20
