Eligible students shall have declared a major within the Chemistry Department. The scholarship recipient shall have achieved a high level of development in the chemical sciences, as demonstrated in the classroom and laboratory. Preference will be given to students intending to pursue a career in chemistry or a chemistry related discipline. Financial need may be a consideration. Chemistry Department faculty will screen and select the scholarship recipient.

One scholarship will be awarded each year to a student completing their second year. The 2015 recipient will be the William Crews McGavock Scholar and will receive $2,000 in each their junior and senior years.

Continued support as a McGavock Scholar is contingent upon maintaining a major within the Chemistry Department, maintaining a GPA of 3.0 or better overall and within the major, and enrollment in a minimum of 24 hours of academic credit per academic year.

Students may be nominated by themselves or faculty, and requested materials will include an unofficial transcript, and a completed application form. Additional faculty input may be requested. Interviews may be used if several qualified students are under consideration. A student’s financial status will be evaluated by the Office of Financial Aid prior to selection. The name of the scholarship recipient will be sent to the Office of Financial Aid before the end of April each year.

Name: _______________________________

Declared major: _______________________

In the space below, please describe a specific topic or event that helped shape your interest in chemistry or biochemistry.
In the space below, elaborate on your interest in chemistry/biochemistry.

In the space below, please describe your post graduation plans.

Submit this form, and an unofficial transcript to Marilyn Wooten, CSI 370 R by noon on Mar. 20, 2015.
